

LESSONS LEARNED REPORT	
Project Name	Freight Joint
Project Sponsor	Yogesh Sharma
Project Manager	Amandip Padda
What went well during the project?	
<ul style="list-style-type: none"> - In our project, the crowning achievement was the final product. This solution not only operated flawlessly but also perfectly aligned with our original vision, embodying the innovation and effectiveness we aimed for from the outset - Our approach to role delegation was highly effective, as it was tailored to leverage each team member's strongest skills. This strategy allowed us to work independently yet cohesively, resulting in a seamless timeline that respected all due dates with minimal disruptions. - Our documentation consistently met high standards, contributing significantly to our project's success. Furthermore, our meticulous weekly displays were instrumental in maintaining organization throughout the project, ensuring a structured and efficient workflow. 	
What did not go well during the project?	
<ul style="list-style-type: none"> - The programming stack we used was one that some of the team was unfamiliar with, so it came with a learning curve. However, the experience gained in the ENSE374 lab was able to help us transition to the new technologies and tools used with ease. - Certain features we had in the back of our mind weren't fully implemented as they were out of the scope of this class. - The presentation was not fully clear, leading to a few missing components. 	
What should we do differently next time?	How will this be done?
<ul style="list-style-type: none"> - Familiar stack. - Presentation 	<ul style="list-style-type: none"> - Using the stack learnt in the lab as it would not be a steep learning curve. - The presentation aspect could be improved via clarity from all parties as to what is expected and required.
