

PROJECT CHARTER	
Project Name	Freight Joint
Date Produced	2023-09-08
Project Goals	The goal of this project is to gain a deeper and practical understanding of the Model-View Controller. This will enable us to build more robust, scalable, and maintainable applications, enhancing our skill set in software development and design.
Project Objectives	The Freight Joint project aims to revolutionize logistics by developing a platform that streamlines the matching of shippers and truckers, ensuring efficient and transparent transactions. Key objectives include creating a user-friendly interface for easy navigation, fostering transparency with clear pricing, utilizing data-driven matching for optimal load connections, and building a robust community of users. This initiative is focused on enhancing overall logistics efficiency and trust in the freight transportation industry.
Project Budget	≈\$4,100
Project Sponsor	Yogesh Sharma
Project Manager	Amandip Padda
Overall Project Milestones	Dates
-LoFi Prototyping	2023-09-29
-HiFi Prototyping	2023-10-06
-Development	2023-11-19
Overall Project Risks	
<ul style="list-style-type: none"> - Possible timeline issues - Lack of certain programming paradigms/methodologies.
